Grand Trunk Lismanagement.

The recent report of Mr. CHAPMAN, before Trunk, in England, has drawn aside the curtain, to some extent, on the affairs of the company, exhibiting the most culpable mismanagement, and revealing a state of things completely justifying those journalists who have from the beginning charged its managers with corruption. It will be remembered that Mr. CHAPMAN came to this country with the epecial object in view of making enquiry regarding the affairs of the Company, and the way it had been managed. Read his report from which we make the following extract, No wonder the whole concern is bankrupt .-No wonder fresh demands are made yearly from the people of Canada. Thousands have been spent to benefit prieste indiriduals, and make political capital. Why slibuld the people of this protince be called upon to pay for such gross extravogence as reported by Mr.

" Proceeding to consider the evidence on which his charges were bised, Mr. Chapman revealed several instances, as he alleged of gross mismanagement and corruption in the working of the line. He stated, with respect to the station of Sarnia, that the Company had been made to pay £24 000 for ewampy land which only cost £240, and the land was no use when they got it, and not all the money of all the capitalists of Europe could make it of use. In one part of Mr. Blackwell's report he had substituted £50,000 000 sterling for the same number of dollars. Another paragraph alluded to the vast increase population in a certain district traversed by the line, while the fact was that there was no swamp which was inhabited by immense publish this protect. numbers of raitlesnakes (laughter) He showed that agreements had been entered into by which the Grand Trook was prevented from having a share in the New York traffic; vent it traspassing on the line. There could be no doubt that the country possessed won derful resources, and the only thing wanted the Great Western of Canada was a most disserrous offsir for the Company, and the steamboat charlet was equally disserrous The Corporation of Kingston had offered the company the whole of one wide street to run their trains through.
